

I Found God

Bride

I want peace in my life
But there's always a sword
The child in me
Has become a man of war
It's not flesh and blood
It's forces unseen
I'm carried to higher places
Than I've ever been

I found God
I want you to know
I found God
I want you to know

I will not fear
What man can do
Survival is a painful toil
Give me strength to see it through

I found God
I want you to know
I found God
I want you to know

Where He leads, I will follow
What He pours, I will swallow
When He twists, I will bend
All my trust in Him

In the Garden of Indecision
I have no apprehensions
In the Garden of Indecision
I have no apprehensions

I am nothing without you
I am nothing without you
I am nothing without you
I am nothing without you

Where He leads, I will follow
What He pours, I will swallow
When He twists, I will bend
All my trust in Him

I am nothing without you
I am nothing without you
I am nothing without you
I am nothing without you

(I am nothing without you)
