Out Of This Town

Broder Daniel

Each day connects to the next I do my routines by reflex Lifes an endless row of days But the heart longs to get away

And I wish I could fly out of here Out of this town

Let no routine keep us down And foe once let not tv Run our lives So I one day can say true I have lived once too

And I wish I could fly out of here Out of this town Id follow the wind, Leave everything behind That holds me down

I wish I could fly away from here Out of this town Id leave them all behind, Where they are stuck Waiting for life (Love)
