

## For A Moment

Brooke Hogan

Lately I've been thinking about the ups & downs  
We've been through together and how we almost lost our ground  
We held on long enough to see all the good outweigh the bad  
And I'm thankful, so grateful for everything we have  
But for a moment I thought I lost everything  
For a moment I forgot about our memories  
Then I woke up and I realized how much you mean to me  
For a moment I thought I lost you and me

My first love, my first kiss I shared both of them with you  
From the first time we locked eyes I knew you and I would be the truth  
But since then you've lied to me and I've lied to you  
But we made up and I'm thankful so grateful  
For everything we have  
So beautiful that's what we are  
I'm your sky and your my star  
All the trials that we've been through  
Only made us who we are today

But for a moment I thought I lost everything  
For a moment I thought forgot about our memories  
Then I woke up and I realized how much you mean to me  
For a moment I thought I lost you and me

Your connected to everything and everybody that matters to me  
You're the center all my charm without I wouldn't be  
I thought I lost my best friend  
My perfect world came to an end  
But it was just a dream that felt like reality

But for a moment I thought I lost everything  
I thought I lost my baby  
I forgot about our memories  
Then I opened my eyes  
Then I woke up and I realized how much you mean to me  
For a moment I thought I lost you and me  
I thought I lost you and me
