

## Alarmed

## Built to Spill

In the hurry of the past  
I forgot to make it last  
Simple choices made too fast  
By a dye I didn't cast

I'm alarmed and I can't help from  
Crashing onto this island we've become  
Words for fighting, words for fun  
They've all melted into one

On the tip of every tongue  
Like the new name for the sun  
I'm alarmed and I can't recover from  
Crashing onto this island we've become

Alright now, don't decide about that now  
Oh, how can you blame the only one?  
Ever stay, ever stay, ever stayed around, and you would  
Never say, never say all the harm's been done

And you were all so gone, oh so long, so long  
Did you make it all wrong, so wrong?  
Did you wait oh, so long, so long?  
Did you take it all wrong, so wrong?
