

Temper Temper

Bullet For My Valentine

This time you'd better bite your tongue
Think twice before you open that mouth
Save your breath, hold it in your lungs
The urge remains, will it overcome?

I feel the tension rising high
I feel my heart pound in my chest
Not seeing straight, just seeing red
Can't hold it back
Here comes my

Temper temper, time to explode (Hey)
Feels good when I lose control
Temper temper, time to explode (Hey)
Chamber's empty, time to reload

Too late cause now you can't disarm
Too slow, you know you should've backed down
Didn't think before you crossed that line?
This intervention's gonna be divine

I feel the time it's drawing near
I feel the sweat dripping down my face
Not seeing straight, just seeing red
Can't hold it back
Here comes my

Temper temper, time to explode (Hey)
Feels good when I lose control
Temper temper, time to explode (Hey)
Chamber's empty, time to reload

Temper temper, time to explode
Temper temper, time to explode
Temper temper, time to explode
Temper temper, time to explode
Temper temper, time to explode
Feels good when we lose control
Temper temper, time to reload
Chamber's empty, time to reload

Oh... Here comes my

Temper temper, time to explode (Hey)
Feels good when I lose control
Temper temper, time to explode (Hey)
Chamber's empty, time to reload

Temper temper, time to explode (Hey)
Feels good when I lose control
Temper temper, time to explode (Hey)
Chamber's empty, time to reload

Time to reload!
