

Keep Eleven On

Caesar

Well I surely can show you
Where you can go stuffing the rest of your memories
Another downer for the really down
We used to run around the secret cemetery
It had a chemistry you rarely find
This glue can keep it all together
But it can break like a glass when you blink at it, just like t
hat
But we keep eleven on, just this once

Someone has to be there in case it's on for real
Can never spend a day without the real appeal
And maybe b-baby it's as real as a clock
So let it come, and let it come, and let it come, and let it ro
ck

Well I haven't come this whole way just to put you down
It's been a long and winding day
The superglue can keep it all together now
But there's a price that you will have to name
This glue can keep it all together
But it can break like a glass when you blink at it, just like t
hat
And we keep eleven on, just this once
Keep it on, eleven on, keep it
Keep it on, eleven on, keep it on
Keep it on, eleven, eleven on

Someone has to be there in case it's on for real
Can never spend a day without the real appeal
And maybe b-baby it's as real as as clock
So let it come, and let it come, and let it come, and let it

Someone has to be there just in case it's on for real
Can never spend a day without the real appeal
And maybe b-baby it's as real as as clock
So let it come

Keep it on, eleven on, keep it
Keep it on, eleven on, keep it on
Keep it on, eleven, eleven on
