

The Only Horse I Ride Is A Nightmare

Camisado

I heard someone say it
They said, "let me out."
But with a voice so distant
They won't hear a sound

Look at what you've done
You've murdered the sun
You took it all and turned this dream to a nightmare
Look at what you've done
You've murdered the sun
You took it all and turned it to my worst nightmare

I am the last man standing
I looked them right in the eyes
And said, "get out of my face."
The one that I just replaced

The most real that I can be
Is the act that I put on for you

But this show is about over
I'm about to wake up I won't remember anything

I won't remember the dream
I'll just remember the nightmare

Look at what you've done
You've murdered the sun
You took it all and turned this dream to a nightmare
Look at what you've done
You've murdered the sun
You took it all and turned this dream to a nightmare

Pain, pain, go away
Come again some other day
