## Love Song

## **Canton Jones**

I made the heavens farther than the eye can see Placed the stars in the sky, made the moon shine brightly Woke you up with the sun shining through your window Sing you a serenade every time the wind blows

See the earth in all of it's beauty It all came from Me Take the time to look above And you'll know, you can't sing about love Without singin' bout me

Singin' bout Me Without singin' bout Me

I made the clouds, even the air you breathe Made you in My image, so that you can be like Me My love is sweet, more to make you happy Such joy and peace, wanna give you all of Me It's the reason why you smile It makes livin' all worth while It would bring tears to your eyes

So how you gon' sing about love, without singin' 'bout Me? [Repeat]
