'Til Death

Capture the Crown

Hold up! Carefully holding you tighter Carefully holding you close

Can you help me open my eyes To see what is pure And what is right? I've been trapped in this Fantasy all my life

Do I have to search for words, Can I just smile? What we have isn't far from good, Nor good from far I've made these mistakes all the time But our time is now

So in love, I'm falling deeper and deeper, I'll wait for you What I have is all I have to give And I want to give you it all

Emancipation of myself Is only the beginning, I'm a compass Give me direction to go in.

'Til death do us part Take it from the top 'Til death do us part,

I hear nor see anyone but you I see no one but you, You stop my world

'Til death do us part, You'll by my special lady(2x)
