

It Still Remains

Cartel

It still remains
And I can't pretend it's gone
Count on me, to remember who you are

It still remains
What if you were wrong?
I shouldn't let, I shouldn't let you get too far
And what do I, I have to lose?
And what do I, I have to do?

Is there any other way to stop thinking bout'
Any other days, we had it figured out
Don't wanna lose you after all we've been through
Is there nothing I can say to turn you around?
Maybe that's the way to stop thinking bout'
All those yesterdays that still remain

It's killing me, wondering where you are
You don't call, but your voice won't go away
It still remains
I'm broken but I'm bent,
On finding you, and hoping that you stay
And what do I, I have to lose?
And what do I, I have to do?

And oh is there any other way to stop thinking bout'
Any other days we had it figured out
Don't wanna lose you after all we've been through
Is there nothing I can say to turn you around?
Maybe that's the way to stop thinking bout'
All those yesterdays that still remain

Okay, it doesn't matter
Cause' I'm still yours
Didn't talk to find a pattern
We will find a cure in this design

Is there any other way to stop thinking bout'
Any other days we had it figured out
Don't wanna lose you now

Is there any other way to stop thinking bout'
Any other days we had it figured out
Don't wanna lose you after all we've been through
Is there nothing I can say to turn you around?
Maybe that's the way to stop thinking bout'
All those yesterdays that still remain
That still remain
