

## Partner In Crime

Cashless Society

I've been with you for 20 years  
We had good times, we shed some tears  
Together we made it right  
Life beat me up from time to time  
I lost some teeth, but I don't mind  
My brother, you're doing right  
You give me hope, you hold me when I fall  
You're my friend, my partner in crime  
In all those years, you never told me lies  
But sometimes you poison my mind  
People come and people go  
There's one thing that I know  
That you, you'll always be around  
You stick to me like superglue  
And that is what I like about you  
You never let me down  
Another drink, another night  
Another town, another fight  
Together we'll make it right  
You give me hope, you hold me when I fall  
You're my friend, my partner in crime  
In all those years, you never told me lies  
But sometimes you poison my mind
