I've been making my own time But I've got to keep picking up gr ound Took time but I realised There is a force that's keeping m e down

Dreamer with the dream dreams on And the laughter and the song plays on Play on forever

I've been making my own way Through faceless people in crowds D on't hear what they say But the thoughts are keeping me down Do n't you want to be found? Well you want to strat picking up pie ces The future calls but I've yet to meet it Till I leave it al l, left behind

Dreamer with the dream dreams on And the laughter and the song plays on Till the darkness of the night is gone Till the mornin g brings the light shine on Shine on forever

Bring me out in open fields Set beside the sea They promise me a better life Safe in Galilee When you get that open space Eart h beneath your feet What you find is close at hand Safe within your reach

I've been treading my own path Obstacles I've left behind I was blind to the rhythm of this life But now I'm looking through c lear eyes Don't you want to have clear sight Well you better st art making your own way

Darkness of the night is gone Till the morning brings the light shine on And the dreamer with the dream dreams on Let the laug hter and the song play on Play on forever Feel the love
