People In The Hole

Catherine Feeny

The people in the hole they don't understand
the people outside of the hole
The people in the sky don't understand
the people who stand on the land
The people in the light they don't understand
the people in the dark
The people in the mall they don't understand
the people in the park.

if we wanted to learn X3
Could we?
Could we?

The people on the edge they
don't understand the people on the ball
There're people climbing up
There're people sliding down
Two sides of the wall
The people in the boat they don't understand
the people in the water
Half of the people don't know just what they'd do if
they listen to each other

if we wanted to learn X3
Could we?
Could we?

The people in the hole they don't understand
the people outside of the hole
The people in the sky don't understand
the people who stand on the land
The people in the boat they don't understand
the people in the water
And the people don't know don't know don't know
how to listen to each other

if we wanted to learn X3
Could we?
Could we?
