

Get Away

Cavo

I got a little hole in a brand new heart
I got to say a grace when I'm falling apart
Couldn't find the words that I wanted to say
Never would have mattered to you anyway
Anything you want give it take it apart
Anything you love never keep them at heart
Burning to the ground is what I wanted to feel
Never trade a moment if it wasn't real

Go on you are no one
I'm no one when you're gone
So go far away where I can never find you
Go far away get away I got to get away from you

Got to find a voice when you wanted to leave
Painting on your face where you couldn't believe
Burning in the fire of a thousand suns
You were never anything to anyone
Made it to the end where you wanted to start
Take it to your breath when you fall apart
Which I could have heard what you wanted to say
Never would have mattered to me anyway

Go on you are no one
I'm no one when you're gone
So go far away where I can never find you
Far away get away I got to get away from you

Far away I got to get away from you
Far away
You are so far away go where I could never find you
Far away get away I got to get away from you
Far away get away I got to get away from you
Where I can't find you
Get away I got to get away from you
