Let It Go

Cavo

Wait it out till the light
Take a breathe, say good night
But don't ever go away

Wait around to find the time
Only you can take what's mine
But don't ever go away

I'll be waiting', I need to let it go

Fade it out into the light
All these years we never get it right
I need to let it go

No more reasons to deny
That I believed that you were mine
I need to let it go

A chance to change or stay the same
One night with out the blame
That will never go away

Only you can make it right
To walk away and have no fight
But don't ever go away

I'll be waiting, I need to let it go

Fade it out into the light
All these years we never get it right
I need to let it go

No more reasons to deny
That I believed that you were mine
I need to let it go
I wish you'd let me go
