We All Fall Down

Cavo

Everything is random, everyone is fake
Everything we built will just disintegrate
No one will remember, would anybody care
If everything around us just disappeared?

But don't let them change your mind
I'm trying to save you now
We all fall down when it's over now
We won't be broken now, we all fall down

Said you'd never leave me, it's like you're never there
Moments that we wasted turned into years
Take a look around you nothing's ever fair
The reasons that they change you turned into fear

But don't let them change your mind
I'm trying to save you now
We all fall down when it's over now
We won't be broken now, we all fall down

In need of a change, the need of the light
The moment was wrong when no one is right
And I know that someday you'll turn your back to me
I know that someday you won't be there for me

I'm trying to save you now
We all fall down when it's over now
We won't be broken now
We all fall, we all fall down
We all fall, we all fall down, we all fall
