Carbon Heart

Cemetary

It's all lost It's all gone Once so proud once so strong Watch the ashes roll away The pain that I portray

The emotions rage All black within Crawling on ice so thin Can you know who sees Within the carbon heart

Done with fear Done with guilt The dreams so sweet in this cage i've built The final layer has been peeled Nothing left to feel

The emotions rage All black within Crawling on ice so thin The burning rose won't let it go Lost all sense of pride swallow the cianide Can you know who sees Within the carbon heart (2times)
