

Do Little Things

Changing Faces

See the birds as they fly away
They give thanks for another day
And the hearts of the lonely ones
Found in you they can trust
There goes the light again
But the light you see
Left them dim
And they will never forget the love
That you shared with it

Oh I don't mind having your attention
And I hope in time
That the whole world will listen and

Do little things today, do little things to do
Do little things 'cause I know what it means to you
Do little things 'cause I know what it means to you

See the glow on your face
It's a reward no one can take away
And the joy that runs through me
Is so free
I love being the part
Even if the smallest heart
Let's me in
I want to friendship that will never, never, never end

That's why I...
Do little things today, do little things to do
Do little things 'cause I know what it means to you
