

# Stay Away

Charli XCX

You choke my throat  
With words of wonder  
You make it hard to breathe  
Your love's so cold  
Just like an arrow  
Pierced through my skin I bleed

I knew you were no angel  
But god, what did I do

Do you remember what I said  
That first time we met  
Stay away, why couldn't you stay away  
I never needed anyone  
But now that you are gone  
Stay away, won't you just stay away

Taking all my light and blocking out my vision  
Bad little girl you have trapped in the prison  
On my hands on my knees pulled on the chains  
Licking up the blood yeah I made this decision

You took my light  
Trapped in the prison  
You threw away the key  
You are the curse  
I am the captive  
Walking on hands and knees  
Never learn... never learn... never learn... never learn...

I knew you were no angel  
But god you're just electric blue

Do you remember what I said  
That first time we met,  
Stay away, why couldn't you stay away  
I never needed anyone  
But now that you are gone  
Stay away, won't you just stay away

Stay away, stay away, stay away...

I climbed a wall  
To touch your shadow  
I hear you call for me  
But you're not there  
You're just an echo  
Why did you fall for me

Do you remember what I said  
That first time we met,  
Stay away, why couldn't you stay away  
I never needed anyone  
But now that you are gone  
Stay away, won't you just stay away

Taking all my light and blocking out my vision

Bad little girl you have trapped in the prison  
Stay away, why couldn't you stay away  
Taking all my light and blocking out my vision  
Bad little girl you have trapped in the prison  
Stay away, won't you just stay away
