

## Been There, Done That

Christopher Cross

You've seen my face  
Hey, don't you know my name  
It wasn't all that long ago  
I had my fifteen minutes of fame  
If it was you, caught in a crazy game  
Would you still look as good standing in the rain  
Whatever gets you through the night  
Take it from me, it's gonna be alright  
Been there done that  
Been there, then somebody takes you back  
Been there done that  
So hard, hard to avoid the trap  
They break your heart, why do we let them in  
The drug is strong but the will is weak  
We make the same mistakes again  
There comes a time we all gotta rise above  
Look inside and redefine, just what it is we want from love  
Been there done that  
Been there, still working my way back  
Been there done that  
So hard, hard to avoid the trap  
And when you feel strong enough to face up to it  
You're gonna do just fine
