## **Be with You**

## Chumbawamba

The future glints like the moon on an old slate roof And everything you say sounds like the truth The things you did made half my dreams come true And I wanted to be with you And I wanted to be with you

Sing your songs of what could be Of all the things you brought back home to me

And I wonder what the papers are going to say Another actress, another war, another day But everything's changed, the world woke up today And I wanted to be with you And I wanted to be with you

Sing your songs of what could be Draw the world for those who couldn't see

And I wanted to be with you
