

## Quiet Down

Circa Survive

Come between us, in our language, we stand up  
Underneath it, buried deep inside your ancient walls  
Replicate, many ways, destination melt away  
Separate, and never say, transformation incomplete

How could I change? I'll never stay with you  
And never stop regretting it  
Search for my name, I'll never say sorry  
An accident within itself  
Stay within reach, the answers you seek, are everywhere  
(Show me where)  
You just have to quiet down  
Lay back and know, the less that you show, beyond regret  
The further you'll go

Just as the first words you spoke  
Just as the fire, you burn out, oh  
Circle the hearts that knew lies  
The vision that haunts you in the night  
Keep it inside

In our story you, have everything you want  
Taste regret in all the faces we have seen before

Cut away, separate, destination self-destruct  
Replicate, never say, all of it was just dumb luck

How could I change? I'll never stay with you  
And never stop regretting it  
Search for my name, I'll never say sorry  
An accident within itself  
Stay within reach, the answers you seek, are everywhere  
(Show me where)  
You just have to quiet down  
Lay back and know, the less that you show, beyond regret  
The further you'll go
