

See How

Coasts

Let's find a place where nobody goes
When the sky opened up for the sun to show
Its pretty face
You let the light escape

Wondering the eyes of your vacant mind
We'll reach the new highs of a different kind
It's a place we crave
That warm embrace

See how the rain washed away
Oh, how the colors fade
You broke my whole
A thousand times more

Is this the reason for your silver smiles?
Lose enough for you, it's underneath the night
Counting down the days
Onto our feelings fake, go

And the beast that we fear has got the mud in his eyes
A swamp is near, smell the blood
Hear the cries across the city streets
You've got glass in your feet, go!

See how the rain washed away
Oh, how the colors fade
You broke my whole
A thousand times more

It's too late, it's too late
Don't tell me what to do
It's too late, it's too late
Oh, you're talking like a fool

Stop forcing me to choose
It's too late, it's too late
Now there's nothing left to lose
It's too late, it's too late

See how the rain washed away
Oh, how the colors fade
You broke my whole
A thousand times more
