

Off To Sleep

Cœur de Pirate

Time stood still for a while
Your hand was holding mine
The stars that shined in your eyes
Don't let them go by
Fly on you golden girl
And take on your fears
I'll be with you in your dreams
The world is darker than it seems

And I'll be waiting for the light
That guides us through the worst of nights
And I'll be waiting for the sign
You're coming back
And you have found your path

I know that you've seen the worst
Your heart's been torn before
Those creatures won't let you go
So hang onto what you know
So sail on you golden girl
And fight against those fears
I'll be with you in your dreams
Of the world without a queen

And I'll be waiting for the light
That guides us through the worst of nights
And I'll be waiting for the sign
You're coming back
And you have found your path

And I'll be waiting for the light
That guides us through the worst of nights
And I'll be waiting for the sign
You're coming back
And you have found your path

And I'll be waiting for the light
That guides us through the worst of nights
And I'll be waiting for the sign
You're coming back
And you have found your path
