

This Day

Cold Chisel

I'm gonna find a way to make this day
The best one so far
It didn't happen yesterday
Hangin' in the bar

I rang someone from long ago
Someone from a situation
Long forgotten, better left alone

If you believe in love, you leave the door ajar
I'm gonna find a way to make this day
The best one so far

I'm gonna find a way to blow away the rain
It didn't happen yesterday
I couldn't face the train

All around, the office crowd
Filled the city, talking loud
Off their face, I slipped away alone

I wandered home, the streets were empty
As they often are
I'm gonna find a way to make this day
The best one so far

I'm gonna find a way to turn this world around
Find a way to make it through,
And not go down

If you believe in love, that's the morning star
I'm gonna find a way to make this day
The best one so far

If you believe in love, you leave the door ajar
I'm gonna find a way to make this day
The best one so far

If you believe in love, that's the morning star
I'm gonna find a way to make this day
The best one so far.
