

God's Song

Cold

A victim to another level
That no one ever cared about
The way I ease my sufferin
Is killin me again
I would not prescribe this feeling for you
A pain with slow sustain
Like a sad song lives on

When the world wont take you back
You know everyone's the same
We're all a part in gods song

Can't live with this pain forever
There's nothin left to talk about
The rain outside is troublin
It takes me back again
If I can't describe my feeling for you
The game will never change
Like a sad song lives on
