Connie Francis

A while ago I was a lonely girl
Without a goal or purpose in this world
I thought of life and made my plans
To find myself a wealthy man, it's true
Then I met you

And I turned another page of life
And found out what true happiness can be
I turned another page of life
And found out what I really want is you

The young girl of before just had to learn
That the woman inside of me must have its turn
What meant so much to me before
Has no importance anymore, it's true
'Cause I met you

And I turned another page of life
And found out what true happiness can be
I turned another page of life
And found out what I really want is you

What meant so much to me before
Has no importance anymore, it's true
'Cause I met you

And I turned another page of life
And found out what true happiness can be
I turned another page of life
And found out what I really want is you

Yes, I turned another page of life
And found out what true happiness can be
I turned another page of life
And found out what I really want is you
