## **Redemption City**

## **Corrosion of Conformity**

Lost in a dream high and wide Whatever price to keep it by our side The steps to the top are very steep King of the hill when all are fast asleep

But I'm Stuck in between And I know you know what I mean What a pity Redemption City

Broken hearts toast another round And drink to the lost there's not a soul to be found Lonely boy says come what may I hate to see it always end this way

But I'm Stuck in between And I know you know what I mean What a pity Redemption City

Simple words remind me Cluttered room haunts me Come back yesterday

The soul is tired and I want to go home And close the curtain on everything you've known But the curtain is high wide and long And kills the dream, so we sing this simple song

Stuck in between And I know you know what I mean What a pity Redemption City What a pity
