

When It Rains

Cowboy Mouth

Hear the sudden rumble in the distance
See the clouds that dominate the sky
I answer when you ask for my resistance
But never take the chance to find out why

Take a look around
Tell me what you found
A subtle kind of sin
Tingle in your skin
Please we won't be chained
Pickup what remains
I love the way you kiss me when it rains

Maybe there is something in my future
Maybe there was something in your past
That makes you want to bite your bright and shiny knight
Who's finally come to rescue you at last
So make a little time
Pour a glass of wine
Make yourself at home
'Cause now we're all alone
Plead for my disdain
The pleasure of your pain
I love the way you kiss me when it rains

I never wanted this
A life without your kiss
It's not a life I could endure
Do what you wanna do
But don't ever say we're through
Cuz all I want from you is more... more...

Lay the blame securely on my shoulders
Lick my dirty fingers when you're done
The world sees me and you for what we say and do
And never for the animals we've become

Take a look around
Tell me what you found
Another kind of sin
Tickle in your skin
Tease what can't be tamed
Pickup what remains
I love the way you kiss me when it rains

Cats and dogs falling through the fog
Another glass of wine
It'll make you lose your mind
There is no one I can blame
I've lost all sense of shame
Cuz I love the way you kiss me when it rains
I love the way you kiss me when it rains
