

## Life Is Deadly

Cripper

Get low, get down  
To the roots of trouble  
Take this baby by the horns  
To the bottom of the bottle

Like marching  
These thoughts keep sickening my head  
First face it and then break it?  
I know better, who knows best?

It was, it is and will be  
Life is deadly  
My friend, we feel the same  
My friend, what we see is true  
Never walk alone

One can say your voice is sore  
And everybody does in fact  
This head tripping  
Is throat-twisting

See what the perspectives have to offer  
When you change your point of view  
Move -- turn -- look!  
You might surprise yourself

Regress:  
What I supposed was wrong  
I could not keep myself  
All my hopes now look so silly

Regress:  
It's me against myself again, so what?  
Please, don't just leave a note  
And the rest to me

Wake up, get up!  
Before the moment's gone  
You're lost for now  
But not for long

Save the big words for the chorus  
They say  
I say shit because I like the sound of it
