

Say Goodbye To Mother Earth

Cro-Mags

It's time to stop this mindless system
System of death that destroys the earth
We're not blind
I see the changes come
Barren toxic wastelands when they're done

Save her! Crystal clear waters
Become lakes of poison
Lush green forests destroyed for one reason

Dying generation that brings us down
We got to make the mother fuckers step down
We're gonna bring 'em down

Revolution with a cause
Save the air, trees, water and the animals
Just for their greed they'll make the sacrifice
World where we live so now we gotta fight
Say good-bye
