

# Slowdance Anywhere I Go

Crush Luther

I'll put my tails on, and we'll hit the town  
If you could kiss the world, you'd turn it all around  
I think we should, we should, I think we should be together  
I'm trying to love you like you never pushed me around

When I am a man will you want to be with me  
Who wants to make it big alone, and traveling is tricky  
We might be walking at the start, and walking's just so slow  
But with you I could slow dance anywhere I go

Forget the romance, tie me to the bedframe  
And if we understand each other, you won't mind that I forget y  
our name  
I think we should, we should, I think we should be together  
Two strangers fit together in a strange way

When I am a man will you want to be with me  
Who wants to make it big alone, and traveling is tricky  
We might be walking at the start, and walking's just so slow  
But with you I could slow dance anywhere I go

I'm a strange boy with a strange sence of worth  
And I'm a thief if I take what belongs to the earth  
A story about the right thing happening at the right time  
And then you walked, and I changed with the story line  
And I'm an orphan cause I took you, cause I needed to  
Cause I never had love that I could live through  
So do I get to, or I don't get to be your man?

When I am a man will you want to be with me  
Who wants to make it big alone, and traveling is tricky  
We might be walking at the start, and walking's just so slow  
But with you I could slow dance anywhere I go
