

Reap What You Sow

Current Swell

You started runnin' but where did you go
where did you go you don't know
you started runnin' to reap what you sow
reap what you sow now you know
that things don't come easy
you were passed aside like a stone
so if you wanna please me
you go find that path on your own
on your own

You started talkin' but what did you say
what did you say what did you say
but you wouldn't stop your talkin' no you talked all day
talked all day but what did you say
See your mouth is movin' now
well its movin' movin' movin'
it's easy to see
It's a battle that your losin' now
well your losin' losin' losin'
it means nothin' to me

You gotta second chance you know the sun will rise again
rise again
Yeah you gotta second chance you see the sun will rise again
rise again
Hold your head up don't you see the sun will rise again
rise again
Hold your head up yea you know the sun will rise again
the sun will rise again
