Let's not forget, though trying times there are We have not lost the war, by far Still work to be done And as the old hymn says, We all can overcome Let's not forget the sunrise in the sky The love and wonders why You don't do or die But at best you try Don't let life pass you by Do what you do when you're feeling free You can be what you want to be Open your mind and you can see Baby let's not forget this love is all we need Kiss me once and maybe kiss me twice Sweetens the spice of life my child Just give me a smile It is your big world to make it all worthwhile

Let's not forget advice on love today
I'm really not so wise this way
So what do you say
Two loving human beings
Just trying to make a way
Do what you do when you're feeling free
You can be what you want to be
Open your mind and you can see
Baby let's not forget this love is all we need
My baby my baby my baby
Do what you do, do what you do
Do what you do when you're feeling free
You can be what you want to be
Open your mind and you can see
Baby let's not forget this love is all we need
