Hey Joe

Daniel Johnston

Hey Jude Come on, Joe Don't make that sad song Any sadder than it already is Hey Jack, get back Get yourself together Come on, come on I know you're thinking of your nervous love I know exactly what you're thinking of Hey Cid, no matter what you did It can work out, work out No matter how you feel right now Hey George, do your chores Don't feel sore I know it's a lot more than just being bored There's a heaven and there's a star for you There's a heaven and there's a star for you There's a heaven and there's a star for you
