

Give Me Life

Daniel Powter

Right directions, I got problems with your friends
understand my point of view
and I'm not bothered I break before I bend
give me life, give me life, for what I do.

I can't remember and everything the same
and what you think that I should be
you pushed me backwards, I played the stupid game
give me life, give me life, for what I say.

And the moment that you lose yourself
you wish that you were someone else
and the only thing that comes apart
to take respond from were we start.

Cause I got not excuse for the way I talk to you
but you don't compromise you nothing new
let's get together and see what we become
give me live, give mi live, for what I've done.

What's the answers
I fall between the cracks
I'll be happy when you sink
I was promised if you're through with us
give me life, give my life, for what I think.

And the moment that you lose yourself
you wished that you were someone else
and whatever else is going on,
everyone will know once your halfway go.

You got no excuses for the way you treated me
And I don't compromise to easily
let's stay together
to see what we've become
give me live, give me live, for what I've done.

Give me life, give me life, for what I do.
Give me life, give me life, for what I do.
