## **There You Are Again**

## **Dave Dudley**

About the time I put myself in fairly decent shape there you ar e again

About the time I go to bed and finally fall asleep there you ar e again

About the tim that I stop seeing your face everywhere and I think that I may live again

When I think that I've forgot the color of your hair there you are again

I stay busy to forget that I was once a love of yours

And I hope that I can be the same old way I used to be before y ou came along

About the time I think that I can put you from my mind Without you the world won't end

About the time I start to smile and think I'm feeling fine ther e you are again

About the time I think that I can put you from my mind... There you are again
