Hear Me Calling

Delta Goodrem

Is calling, patience falling Distant dreams and thoughts of you Time is wasted in far off places Wish I could fly and be with you

No time for sentimental thoughts in my head Do you keep me in your dreams, can you hear me calling Hear me calling

And I know you're there I search the stars To see your face lit in the sky I love this place and I know why You're always there in my mind But I wish that I could hear You're silly voice sing in my ear Hold you're hand and hold you near And if I fall you can hear me call

Makes me wonder, the spell I'm under Trapped inside me, will I be true So much to see, where will I be My world is changing and I change with you

No time for sentimental thoughts in my head Do you keep me in your dreams, can you hear me calling Hear me calling

And I know you're there I search the stars To see your face lit in the sky I love this place and I know why You're always there in my mind But I wish that I could hear You're silly voice sing in my ear Hold you're hand and hold you near And if I fall you can hear me call

No time for sentimental thoughts in my head Do you keep me in your dreams, can you hear me calling Hear me calling

And I know you're there I search the stars To see your face lit in the sky I love this place and I know why You're always there in my mind But I wish that I could hear You're silly voice sing in my ear Hold you're hand and hold you near And if I fall you can hear me call
