

# I Found You

Demis Roussos

My life was like an empty well  
My heart beat inside an empty shell  
Then you came when all else was gone  
And you made me strong to carry on

Now I found you  
I'll build my world around you  
Let my love surround you  
I thank the day I found you

My hopes were like a fading dream  
My hope was the gift you gave to me  
In the night when I was afraid  
You stretched out your hand  
And I reached out and then

I found you  
I'll build my world around you  
Let my love surround you  
I thank the day I found you

And I found you  
I'll build my world around you  
Let my love surround you  
I thank the day I found you

And I found you  
I'll build my world around you  
Let my love surround you  
I thank the day I found you
