## **Summer Wind**

## **Desert Rose Band**

Anxious eyes wait by the window She waits she hears the wind blow Taking all she has that she knows It's a cold summer wind

No it's not the first time Her heart feels like the last time A never ending bad rhyme Like a cold summer wind

Can't you see what I've been through All I've done, I've done for you Can't you see your world won't end It's just a summer wind

Daddy's once a week girl The only one in my world Dry your eyes and comb your sweet curls I'll be coming back again

Yeah, your mom and I we both know Everyday you live we all grow Only God can make the wind blow Like a warm summer wind

Can't you see what I've been through All I've done I've done for you Can't you see your world won't end It's just a summer wind

I know you want us back together I know what we've put you through When you hear the wind blow It'll bring us close to you

Can't you see what I've been through All I've done I've done for you Can't you see your world won't end It's just a summer wind

Can't you see what I've been through All I've done I've done for you

Can't you see what I've been through All I've done I've done for you

Can't you see your world won't end It's just a summer wind
