

True Love

Desert Rose Band

It's a true love, not a new love
That makes my life so much better
Tried and proven down through the ages
And it's guaranteed to keep us all together

Little children teach us so much
Remind us of what we've been missing
Something precious left behind us
Gathering dust while we've been drifting

I think you know what I'm speaking of
When you're down on your knees
All alone in the night
Would you turn away from a true love
There's not a man of us alive
Who can deny true love

Without the blessing of a true love
A life so cold and uncaring
It's the message for a lifetime
And the sweetest gift of life is the caring

I think you know what I'm speaking of
When you're down on your knees
All alone in the night
Would you turn away from a true love
There's not a man of us alive
Who can deny true love

I think you know what I'm speaking of
When you're down on your knees
All alone in the night
Would you turn away from a true love
There's not a man of us alive
Who can deny true love

There's not a man of us alive
Who can deny true love

There's not a man of us alive
Who can deny true love
