I drove my truck into a moving van
It was filled all the way up with jet fuel and
I crashed right in and an explosion
Smashed through the window and ripped off my hands

Medical team drove up and found me
Bleeding in pieces picked up off the street
Drove me into a filthy hospital
Horror experienced financially

Woke up in pain in a gown in bed
Internal hemorrhaging inside my head
I really think that I should be dead
I saw the bill and then I cry bled

To keep me alive it is costing me
National Deficit times three
There is no way to avoid this fee
Please pull the plug and kill me

It's costing too much
Pull the plug
It's costing too much

Pull the plug
Pull the plug
Pull the plug
Pull the plug
Pull the plug

Pay you my life instead of life support
Harvest my plasma because it's worth more
Take all my blood and my organs
Sell them to buyers over in third worlds

Burn my cadaver for some energy
Charge the patients in their misery
Such a strong quarter for the industry
Pharmaceutical fucking victory

Can't pay the price
(Pull the plug)
Pay with my life
(Pull the plug)
Say my farewell
(Pull the plug)
See you in Hell
(Fucking pull the plug)
