

## Lonely Nights

DGM

Days and days waitin' something happened  
empty eyes and empty soul  
grey sky, dark nights  
all my energy goes .. all my energy goes

I'm alone in this lonely night ... like a star without light

The only way to get out of here is looking at this thing without fear  
the only way to get out my God is waitin' an answer without love

Slowly, slowly in the silence lonely days in my hands  
looking inside at the storm of the soul that reveals the center  
and the dark  
is gone

You never heard me when I cried for your immense eyes  
nobody seems to know the circle of fire - you gave to me

I believe in everythin you said to me the faith is gone and the  
help is in  
the opposite

The only hope that you come here makes me feel without fear such  
a good time  
that we had  
I hope the light is flashin' my death

The only way to get out of here is looking at this thing without fear the  
only way to get out my God  
is waitin' an answer without love I want to see into your eyes  
I want to see what burns inside only your love can take me away  
Believe me, don't go far away

You never heard me when I cried for your immense eyes  
nobody seems to know the circle of fire - you gave to me

You never heard me when I cried for your immense eyes  
nobody seems to know the circle of fire - you gave to me  
You never hear me
