

# Nothing On But the Stars

Dierks Bentley

You know we didn't get it right  
But it wasn't all wrong  
It wasn't just a phase  
And it isn't all gone  
Before we go and let the lonely  
Do what it does  
I want one more memory of us

With nothing on but the stars  
Through the window pane  
Burn your silver silhouette into my brain  
I can't have you forever  
But I'll take tonight  
I wanna remember you right now just like you are  
With nothing on but the stars  
Yeah

You can take your things  
And I'll take my mine  
Before you go and leave it all behind  
I wanna drink you all up  
And you soak you all in  
And watch those constellations crawl across your skin

With nothing on but the stars  
Through the window pane  
Burn your silver silhouette into my brain  
I can't have you forever  
But I'll take tonight  
I wanna remember you right now just like you are  
With nothing on but the stars  
My hands, your hands in the dark  
With nothing on but the stars, mmm

'Cause I ain't ready to let you let me go, oh no  
Just give me one more night to hold you close, mmm

With nothing on but the stars  
I can't have you forever  
But I'll take tonight  
I wanna remember you right now just like you are  
With nothing on but the stars  
My hands, your hands in the dark  
With nothing on but the stars, mmm

Before we go and let the lonely  
Do what it does  
I want one more memory of us
