And then the dark...

I've been way beyond your universe And I've seen things that I should never tell But here I go again I just can't keep it to myself The story of my world and how I fell

Round and round
The square inside the circle
And still I shake the same
At the rhythm of her name

Electra Electra

I believed in love and miracles So how can I be blamed for what I've done? And if it's still a sin to hide the best parts for yourself Then I have sinned but only just begun

There's no thunder, no lightning Just a gentle breeze To warn you that something Will bring you to your knees

Round and round You're caught inside the circle Still I shake the same At the mention of her name

Electra Electra

Hey, I've been way beyond your universe
And I've come back to introduce to you
The fear of the heart, just try to keep it from
yourself
And it will be the last thing that you'll do

Round and round You're caught inside a circle And you will shake the same At the magic of her name

Electra Electra

I am here to show my changes
Not to change what I've become, no, no
I'm not alone and she will testify
That it's the best thing that I've done, oh, oh, for

Electra Electra
