## Said But True

## **Diorama**

And if you offer everything you have I still want more Face and body lacking relevance I still get bored

Cleft in frozen lakes I'm sailing on Ancient scar Try to reach me way too short your chains Bound as you are

What an honest kind of lie To the final answer I dare to ask you for

You took me this far You made me need to change

Could you ever think I'd give
Attention to the true effect of your words
Of your disease

Uninfected I remain
Insensible immune and deaf
Untouchable like clouds

You took me this far You made me need to change You took me this far I never will return
