## Dokken

There's a girl next door with a leather coat And she looks pretty good to me My friends all say that you better watch out There's a side of her you haven't seen Still i took a ride / it was late at night We were cruising along on her motorbike Everything was right / til crazy mary went down So let me tell you about mary crazy mary goes round Let me tell you about mary crazy mary goes round and round Round and round Called my doctor and i tried to explain Cuz it didn't make sense to me Seven different sides and i've seen them all One for everyday of the week She gave me a scare / she was combing her hair A long conversation there was nobody there Does anybody know / what mary's talking about So let me tell you about mary crazy mary goes round Let me tell you about mary crazy mary goes round So let me tell you about mary crazy mary goes round and round Round and round crazy mary goes round Funny thing about mary crazy mary goes round and round Round and round Round and round Upside down
