

One Million Lightyears from Home

Domain

Come take my hand - go for the real thing
Now is the time to take what is yours

Just raise your hands - don't fight the feelings
We just can take on this whole world by storm

Life is too short just to hide behind sorrow
Hope is the key to your heart
Just pack all of your bags - join in to our journey
One million lightyears from home

Nana...

Let's aim for the future - for our new tomorrow
Let's head for the places where our souls should be

We've got the power - we don't need no glory
'Cause love is the magic to make our hearts bleed

Hold on to a dream that keeps burnin' within us
A kingdom of truth can be found
Let our hearts guide the way to a new beginning
One million lightyears from home

Nana...

All our hearts are burning
All our minds are turning
We'll get together in a great harmony
We're gonna live forever
We're gonna give forever
Keeping the faith in our own destiny

Keeping the faith - we're gonna keep the faith
