And if you love somebody And if you want somebody

You've got to tell the people of the world Let's get on up we're ready to go

You've got to make the people understand That love is not a one night stand

We've got to show the children of the world They gotta hold on tight and not let go

You've got to tell the people of the world To open up and show their love

And if you love somebody You need somebody to love And if you want somebody Then find somebody to love

Somebody somebody...

You've got to tell the people of the world Let's get on up we're ready to go

You've got to make the people understand That love is not a one night stand

You've got to tell the people of the world Let's get on up we're ready to go

We've got to make the people understand That love must be in every land
