

Let the Night Fall

Dragonette

I'm three feet deep, I'm sinking in the shallow end
Scotch and sun, giving a lesson on
Stupid fun, friends since the afternoon
Riding bikes to the docks from the avenue

Smoking some, gonna get a little bit
Sunshine bursting, how's your cute cousin?
Yeah, still too young, what time's it anyways?
Black tops, white hot 18 hour holiday

We'll step it up when the sun goes down
Let the night fall, let the night fall
No matter what, we're not stopping now
Let the night fall, let the night fall
We'll step it up when the sun goes down
Let the night fall, let the night fall
No matter what, we're not stopping now
Let the night fall, let the night fall

Still in the dark, now we're all piled in the back of cars
Driven by someone we kind of know
Whoa, look at this one, this picture of us
Look at this picture of us
Yeah, there's so much left
There's something I'm saying, I'm not sure what
I'm not sure where we're going but
We'll step it up when the sun goes down

Yeah, we'll be smoking some, gonna get a little bit
Sunshine bursting, how's your cute cousin?
Yeah, still too young, what time's it anyways?
Black tops, white hot 18 hour holiday

We'll step it up when the sun goes down
Let the night fall, let the night fall
No matter what, we're not stopping now
Let the night fall, let the night fall
We'll step it up when the sun goes down
Let the night fall, let the night fall
No matter what, we're not stopping now
Let the night fall, let the night fall

We'll step it up when the sun goes down
No matter what, we're not stopping now
We'll step it up when the sun goes down
No matter what, we're not stopping now
Let the night fall, let the night fall

We'll step it up when the sun goes down
Let the night fall, let the night fall
No matter what, we're not stopping now
Let the night fall, let the night fall
We'll step it up when the sun goes down
Let the night fall, let the night fall
No matter what, we're not stopping now
Let the night fall, let the night fall

Three feet deep, sinking in the shallow end
